

TESNIT® BA-202 is suitable for non-demanding applications in particular the water supply industry. As such, TESNIT® BA-202 has been designed with good mechanical and sealing properties.

PROPERTIES

SUPERIOR			
EXCELENT			
VERY GOOD	SEALABILITY PERFORMANCE		
GOOD	MECHANICAL RESISTANCE		
MODERATE			

APPROPRIATE INDUSTRIES & APPLICATIONS

-  GENERAL PURPOSE
-  WATER SUPPLY
-  SHIPBUILDING

Composition	Cellulose fibres, inorganic fillers, NBR binder. Optional steel wire mesh insert on request.		
Colour	Pink / Red		
Approvals	Please inquire.

EN 1514-1, Type IBC, PN 40, DIN 28091-2 / 3.8, 2.0 mm

- General suitability - Under common installation practices and chemical compatibility.
- Conditional suitability - Appropriate measures ensure maximum performance for joint design and gasket installation. Technical consultation is recommended.
- Limited suitability - Technical consultation is mandatory.

Surface finish	Surface finish is 2AS. Optional graphite or PTFE finish on request.

All information and data quoted are based upon years of experience in the production and operation of sealing elements. This data may not be used to support any warranty claims. With its publication this latest edition supersedes all previous issues and is subject to change without further notice.

σ_{BO} DIAGRAM

DIN 28090-1

σ_{BO} diagrams represent σ_{BO} values for different gasket material thicknesses. These values indicate the maximum in-service compressive pressures which can be applied on the compressed gasket area in-service without destroying the gasket material.

P-T diagrams indicate the maximum allowed combination of internal pressure and service temperature which can be applied simultaneously for a given gasket depending on its material type, thickness, size and tightness class. Given the variety of gasket applications and service conditions, these values should only be regarded as guidance for the proper gasket assembly. In general, thinner gaskets exhibit better P-T properties.

CHEMICAL RESISTANCE CHART

The recommendations made here are intended to be a guideline for the selection of the suitable gasket quality. Because the function and durability of the products depend upon a number of factors, the data may not be used to support any warranty claims.
